Schoerr Grate Outfits

On pages 3 to 17 of this catalog we show our lines of Gas, Direct Draft and Return Draft Grate Outfits, and also Portable Basket Grates, Gas Logs, Trimmings, etc.

Any one of these Grates can be used with any of the Mantels shown on pages 18 to 30, and we guarantee all of them to be equal in every respect to whatever claims we make for them. (See our guarantee on preceding page.) We recommend, however, where a Coal Grate is desired, that Our Aldine Return Draft Open Fire Place be used. It will give more heat with less waste, burn less coal and require less attention than other types of Coal Grates. The principle of this Grate is fully explained on pages 3 to 6. It is well worthy of your careful investigation.

OUTFITS—By an Outfit we mean the different parts to complete the Mantel, such as Grate, Tile or Metal Facing, Hearth, etc., as follows:

In the Aldine Grates, Outfits Nos. 1, 2, 3, 4, 5 and 6, the entire Grate complete in every respect, including Summer Front, Narrow Fender, Blower, Shaker and Poker.

In the Radium, Wolverine and X-Ray Grates, Outfits Nos. 7, 8, 9, 10, 11 and 12, the entire Grate, including the Frame with Summer Front, with Brick or Iron Fire Liners ready to set into the chimney.

In the Electric, Outfit No. 13, the Fire-place, Tile or Metal Facing and Hearth.

In Unmounted Grates, Outfits Nos. 14, 15, 16 and 17, the entire Grate, including Frame, Fire Basket and Summer Front.

In Gas Grates, Outfits Nos. 18, 19, 20 and 21, the entire Grate, including the Frame with Summer Front, ready to be set into place.

With any of the above complete Grates is also included in an Outfit the Facing, either Metal Plate or Tile, and the Tiling for Hearth.

PRICES—Below the description of each Grate we give the price of the entire outfit. Prices of the separate parts of the outfits will be found on page 13. There is no extra charge for Summer Front, Narrow Fender, Blower, Shaker and Poker.

FACING—Outfits as described in this book are furnished with Metal Plate Facing, shown on page 14. Tile Facing can be had at the same price as Metal Plate Facing if ordered unslabbed, or we can furnish tile slabbed for \$2.75 extra. Slabbed Tile are cemented together and reinforced by metal strips. Slabbed Tile Facing is shipped in three pieces, ready to be set up.

We recommend that our customers use Metal Plate Facings. They are much more desirable than Tile Facings, inasmuch as they do not crack or break. They are easily put up and always stay in place.

If sample of hardware is furnished us, we will finish Fireplace to match. Unless style ordered is in stock, it will take a little longer to ship.

HOW TO ORDER—In ordering any Grate Outfit specify plainly what kind, style and size of facing is wanted, and the size of the Grate, i. e., the height and width of the front. There are two standard sizes, viz., 24½ inches wide by 30¼ inches high, and 30½ inches wide by 30¼ inches high. It is also advisable in ordering either the Radium or the Aldine to give the height, width and depth of the Fireplace opening in the chimney in which the Grate is intended to go. With the above information we can fill orders intelligently; otherwise there is always a possibility of mistake.

Schoerr Mantels

MATERIAL AND WORKMANSHIP—The wood used in making our Mantels is carefully selected, only the best pieces being used. It is thoroughly seasoned and kiln dried before being made up.

We employ only the most skilled workmen in our shops. Every Mantel we ship is perfectly made and fitted. We guarantee the material, workmanship and finish to be better than any other Mantels on the market at equal prices. See our guarantee on preceding page.

FINISH—Every one of our Mantels goes through seven different operations in our finishing room.

If the finish is to be a golden oak gloss, we first stain the Mantel; then we put on a filler of best quality. The first coat of varnish is applied next, after which the Mantel is sand-papered all over.

Then the second coat of varnish is applied and the Mantel again sand-papered all over. For a finish-ing coat, a gloss varnish is put on.

If the Mantel is to be rubbed and polished, we go through the same seven operations as with the gloss finish, except that the last coat is of rubbing varnish. After this has been applied, the Mantel is rubbed by hand, and afterward polished, also by hand.

DELIVERY—We carry Mantels shown on the following pages in stock and can make shipments in a very few days. All Mantels are shipped ready to be set in place. They are carefully crated, without extra charge, and we guarantee safe delivery.

Mantels are shipped from our factory in Michigan, from where customers pay the freight.

See Terms on page 32.

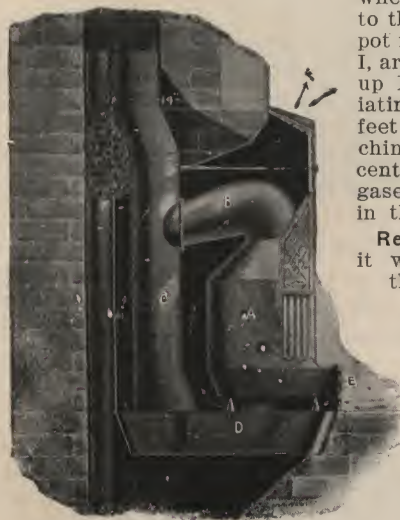

The Aldine Open Fire Place

The Aldine Open Fire-place cannot be compared with the common Direct-Draught Grates offered by all other manufacturers. It is a heater, and has often taken the place of stove or furnace. It is made on the return-draft principle, and will save more than 60 per cent. of the fuel and more than 85 per cent. of the heat, which Direct-Draft Grates waste. By means of our special Top Damper Attachment, the "Aldine" will heat upper and lower adjoining rooms, and, if the chimney be in the right place, one "Aldine" will do the work of four common Direct-Draft Grates.

The Aldine not only furnishes a greater amount of heat from less fuel, by direct radiation, but, in addition, as much more heat by indirect-radiation, and the heat produced by both direct and indirect-radiation is kept in constant circulation, producing a perfect ventilation.

Plate No. 26 shows that the product of combustion when Damper G is turned to the left, pass from Fire-pot into Flue H, down Flue I, around Ash Dump L, and up Flue J through a radiating surface of 30 square feet before entering the chimney K, a large percentage of the heat-bearing gases thus being consumed in the Flues and utilized.

Referring to plate No. 25, it will be observed that the Fire-pot, Flues and Ash Pan are incased in an iron jacket, forming an air chamber. When the Fire-pot A, the Flues B, C and D become heated, they form a radiating surface of thirty square feet over which the cold air, entering openings at either side of base at E, is

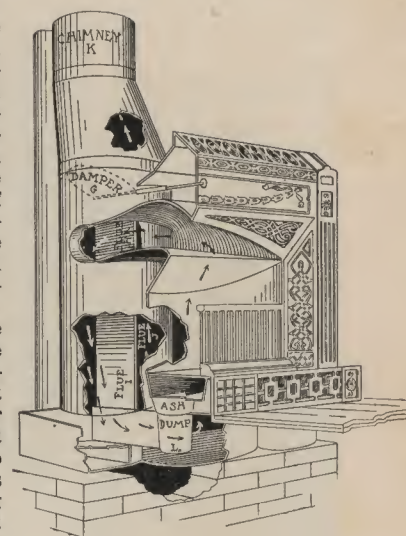

No. 25

passed, heated, purified, and thrown out into the room through register F, keeping up a constant circulation, taking the cold air off the floor and distributing heated air equally throughout the room, keeping the temperature the same in all parts of the room from floor to ceiling, the atmosphere pure and wholesome at all times, and ventilating perfectly without drafts.

The "Aldine" can be piped to any chimney, like a common stove, if desired, burns hard or soft coal, wood, coke, natural or artificial gas with perfect combustion—absolutely no waste of fuel—and keeps fire night and day as long as wanted, and without dust, gas or smoke in the room.

The Aldine Open Fire-place is built in several styles of the finest Stove Plate Iron, is mounted in one piece, and weighs 500 pounds, crated and boxed ready for shipment. It can be set by any intelligent mason by following our simple instructions. The opening in the chimney breast to admit the "Aldine" should be 32 inches high (but 30 inches will do), 26 inches wide (but 24 inches will do) and 12 inches deep.

The "Aldine" saves the use of the furnace, steam or hot water plant at least six weeks in the fall and spring, the saving in fuel being equal within a very short time to the first cost of the "Aldine;" while, during the most severe weather, the "Aldine" can be used in connection with the other heating apparatus without any additional expense for fuel, as the heat produced by both will be circulated by the "Aldine" thoroughly throughout the room and the temperature kept equal from floor to ceiling, while, at the same time giving perfect ventilation and a cheerful open fire.

No. 26

Differences Between the Aldine Open Fire Place and All Other Open Grates

All other Grates and Fire-places, no matter under what name or claims they are sold, are of the Direct Draft pattern; i. e., they are connected directly with the chimney, and the gases of combustion are sucked entirely up into the chimney flue by reason of its draft. The stronger the draft the greater the suction of these gases, and consequently greater loss of the heat generated by the fuel.

The following are the principal differences between the Aldine and these Grates, and consequently its advantages to the purchaser:

First. All other grates are directly connected with the chimney as described above, and the average loss of the total heat generated on account of this is 85%. The Aldine being indirectly connected with the chimney and the gases of combustion having to pass entirely through the body of the Grate before escaping into the chimney flue saves this heat lost by the Direct Draft Grates, and at the same time requires only 40% of the fuel required by these other Grates to produce these greater heating results.

Second. All other grates must be filled every hour or so, and shaken down three or four times every day in order to keep the fire alive and bright. The Aldine needs to be filled only morning and night when hard coal is used, and at each filling requires only about one-half scuttle of coal. It also needs to be shaken down only at these times also. The same proportion of difference in attention in favor of the Aldine is carried out in the use of all other fuels.

Third. All other grates simply throw the direct heat which does not go up the chimney into a small space in

the room, there being no circulation to force it out whatever; consequently the warmth coming from the heat is confined in a space of a few cubic feet immediately around the front of the Grate. The Aldine by reason of its complete base burning circulating principle discharges, both directly and indirectly, the heat generated into the room with sufficient force to drive it into all parts of the room. When this heat becomes cool and heavy and sinks to the floor, by reason of its circulating plan it is sucked into the bottom of the grate, thoroughly heated and purified, and discharged again into the room, thus creating a complete and perfect circulation of pure hot air. This is well illustrated in plate 34.

Fourth. All other Grates by reason of their direct and open connection with the chimney simply draw the air out of the room and discharge it up into the chimney, thus vitiating the atmosphere of the room, and requiring new air to be brought in from time to time. The Aldine does not draw in all the air permanently from the room, but by reason of its circulating principle draws the heavy impure cold air from the floor, thoroughly heats and purifies it and discharges it again into the room at a high temperature and perfect state of purity. No other Grate will distribute its heat so that it will heat even the whole of a good sized room. The Aldine will not only completely heat the room in which it is placed by reason of its circulating principle, but in addition can be piped like a furnace, when equipped with our special Top Damper Attachment, so that it will heat two and even three adjoining or upper rooms in addition, and heat them all satisfactorily. See next page.

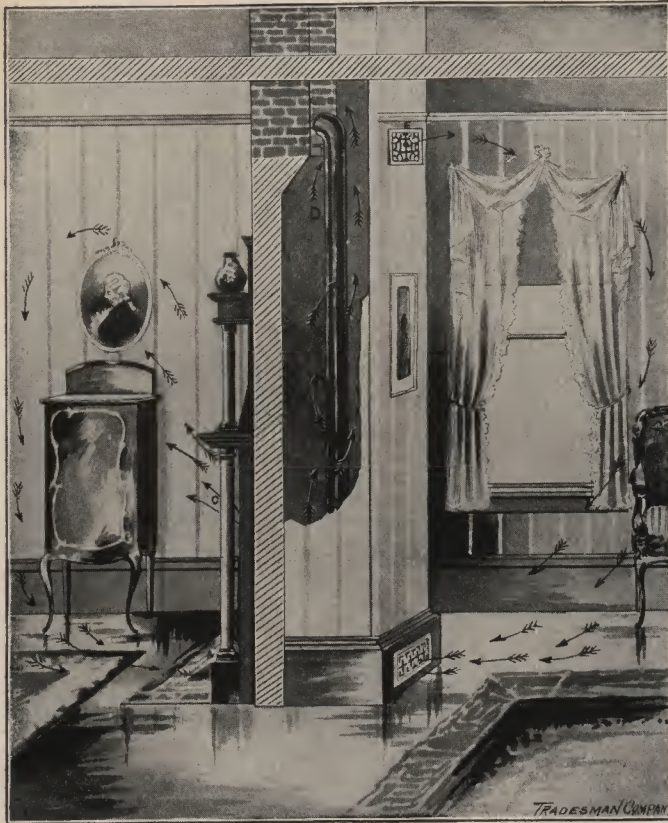

Plate No. 32

Savings of the Aldine

Saving of fuel—The Aldine consumes each twenty-four hours only 25 pounds of hard coal, and with this will maintain a continuous bright red fire, thus producing the greatest possible number of heat units from the fuel consumed. With soft coal, coke, wood or any other fuel, only slightly more attention is required to produce the same results, and its superiority over any other fire-place in this regard is so marked that it may be fairly said that it is in a class by itself.

Saving from dirt—The fact that the Aldine requires to be shaken down only twice each twenty-four hours, and that it is equipped with a special device by which the very small amount of dust and dirt which might result from shaking it down is immediately drawn up into the chimney out of the room, justifies us in making the broad assertion that it is practically absolutely clean.

Saving of trouble—The Aldine is the only Fire-place ever made that does not have to be re-filled or otherwise given attention at least every two hours and sometimes oftener. The Aldine requires this attention only twice during twenty-four hours: i. e., morning and night, and between these times maintains a perfectly uniform and satisfactory fire and heat.

Saving of lost heat—The Aldine by reason of its special construction loses up the chimney flue only about 15% of the heat generated by the fuel. All other fire-places, on the contrary, being directly connected with the chimney flue, waste over 85%, on the average, of this heat. Thus it will be seen that the Aldine with the use of much less fuel delivers to the user over six times the actual amount of heat produced by any other grate.

The Aldine Used to Heat More Than One Room

The illustrations on this page show how the Aldine Open Fire-place can be set and piped to heat adjoining and upper rooms. When used in this way a furnace can be dispensed with altogether in climates where there is no extreme cold, and even in cold climates the Aldine will take the place of a furnace during the chill autumn and spring months.

Plate No. 32 shows the Aldine set in a partition wall, and giving its heat into both rooms. The back of the Fire-place and the Smoke Pipe are enclosed in a false chimney of lath and plastering on studding. The cold air passes into the register at the base of this (as shown by the arrows) following along up the pipe thoroughly heated and discharged into the room again, through the register at E. The back of Grate is thoroughly encased in brick work, so that no possible danger of fire exists.

Plate No. 34 represents the Aldine set for heating one room below and two above; one with register in base-board, the other with False Outfit and Summer Front, giving a very artistic and cheerful effect. Note how the Hot Air Flue is bricked off just above the registers. The smoke pipe extends beyond this point so there is no possibility of smoke passing into the rooms with the heated air.

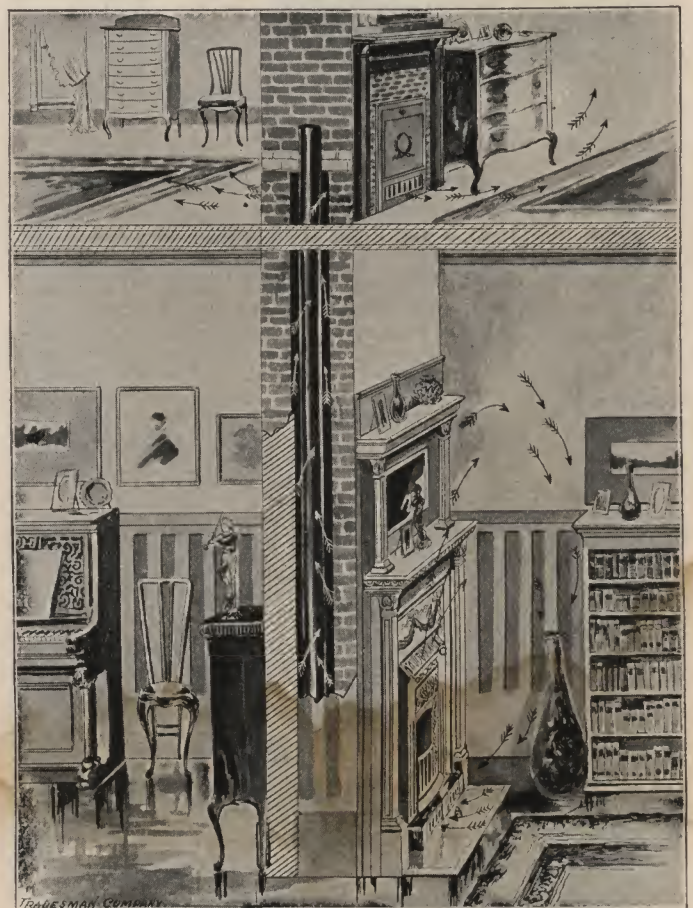

Plate No. 34

Aldine Open Fire Places

OUTFIT No. 1

ORIGINAL STYLE

Outfit No. 1 includes:

Fireplace—Original style Aldine, in any Electroplate Finish, complete with Summer Front, Outside Blower, Shaker and Poker.

Facing—Metal Mantel Plate shown on page 14, or Tile, first quality enamel. See page 13.

Hearth—Tile, first quality enamel, any color, or red unglazed Tile, 60x21 inches.

Price of Outfit No. 1.....\$48.00

OUTFIT No. 2

TWENTIETH CENTURY STYLE

Outfit No. 2 Includes:

Fireplace—Twentieth Century Style Aldine complete with Summer Front, Blower, Shaker and Poker. Can be had in any finish but looks particularly well in Copper.

Facing—Metal Plate Facing shown on page 14, or best quality enamelled Tile. See page 13.

Hearth—Any color of enamelled Tile, first quality, or red unglazed Tile—60x21 inches.

Price of Outfit No. 2.....\$48.00

OUTFIT No. 3

COLONIAL STYLE

Outfit No. 3 Includes:

Fireplace—Colonial Style Aldine, in any Electroplate Finish, complete with Summer Front, Blower, Shaker and Poker.

Facing—Metal Plate Facing (see page 14) or best quality enamel Tile. See note on page 13.

Hearth—Best quality enamelled Tile, any color or red unglazed Tile—60x21 inches.

Price of Outfit No. 3.....\$40.50

See itemized list on page 13.

OUTFIT No. 4

MISSION STYLE

Outfit No. 4 Includes:

Fireplace—Mission Style Aldine in Handsome Wrought Iron Finish, a pure Mission design. Complete with Summer Front, Blower, Shaker and Poker.

Facing—Metal Plate Facing No. 46, which harmonizes in finish and design with this Grate.

Hearth—Best quality enamelled Tile—any color—or red unglazed Tile—60x21 inches.

Price of Outfit No. 4.....\$40.50

For prices of separate parts of all outfits see page 13.

Aldine Open Fire Places

OUTFIT No. 5

RENAISSANCE STYLE

ELEVEN SPECIAL FEATURES OF ALDINE SUPERIORITY

First. Burns only 40% of the fuel required by all other grates.

Second. Loses only 15% of the heat generated up the chimney instead of 85% lost by all other grates.

Third. Gives perfect ventilation of the room by drawing the cold air from the floor, thoroughly reheating and purifying it, and discharging it again upward into the room.

Fourth. Maintains a bright red fire constantly day and night, thus securing the greatest possible number of heat units from the fuel consumed.

Fifth. Needs to be filled and cleaned only twice during twenty-four hours when hard coal is used, only slightly oftener when other fuels are used.

Sixth. Saves the use of the furnace, steam or hot water plants at least six weeks in fall and spring, the saving in fuel thus effected being equal in a very short time to its first cost. During the most severe weather can be used in connection with the other heating apparatus without any additional expense for fuel, as the amount of fuel it uses is more than saved in the furnace.

Seventh. Can be set in any chimney, or in any place in any room and piped like a stove any reasonable distance to the nearest chimney, and will work just as well as though it were set directly in the chimney.

Eighth. Produces the greatest circulation of heat, forcing it out to the furthest corners of the rooms, forcing the cold air downward and back into the base of the grate where it is reheated, purified and again discharged into the room.

Ninth. Will heat two, and in mild climates, three additional rooms besides the room in which it is stalled, by the use of our Top Damper Attachment.

Tenth. Made up in such a variety of modern attractive designs that it can harmonize in every way with the furnishings and furnishings in any room.

Eleventh. Finished in the finest, most artistic, and most perfect Electroplate Finishes that can be produced; finished to match any special finish of hardware or trimmings without any extra charge.

Outfit No. 5 Includes:

Fireplace—Renaissance Style Aldine of very pure character and style, in any Electroplate Finish. Complete with Summer Front, Blower, Shaker and Poker.

Facing—Any Metal Plate Facing shown on page 14. (For tile facing, see page 13.)

Hearth—Best quality enamelled Tile—any color—or red unglazed Tile—60x21 inches.

Price of Outfit No. 5.....\$40.50

Outfit No. 6 Includes:

Fireplace—Empire Style Aldine, in any Electroplate Finish, complete with Summer Front, Blower, Shaker and Poker.

Facing—Any Metal Plate Facing shown on page 14. (If tile facing is preferred, see page 13.)

Hearth—Best quality enamelled Tile—any color—or red unglazed Tile—60x21 inches.

Price of Outfit No. 6.....\$40.50

Prices of separate parts of this outfit are given on page 13.

DIMENSIONS OF ALDINE FIRE PLACES

The Aldine Fireplaces shown on this and the preceding page in Outfits Nos. 3, 4, 5 and 6 are 30½ inches wide by 30¼ inches high, outside measurements. The size of fire-pot in each is 21½ inches wide by 8½ inches deep inside. They will fit into any chimney opening 26 inches wide by 29 inches high by 16 inches deep or larger. Grates in Outfits Nos. 1 and 2 are 32 inches wide by 32 inches high, outside measurements, with fire-pot 22 inches wide by 11 inches deep inside. They will fit into any chimney opening 28 inches wide by 30 inches high by 15 inches deep or larger.

OUTFIT No. 6

EMPIRE STYLE

Radium Grates

On this and the following pages we show our line of Direct Draft Grates, which are unquestionably superior to any grates on the market with the exception of our Aldine Return Draft Open Fireplaces.

In our Radium Grates, which go with Outfits Nos. 7, 8, 9 and 10—shown on this and the following page—we wish to call your attention to the following features:

First. Large Fire-pot.

Second. The Double Ratchet and Screw Dampers which allow adjustment and regulation of fire as desired.

Three. It will burn either hard or soft coal, coke or wood.

Fourth. Fitted with either Fire Brick or Iron Liners (same price).

Fifth. The Liners are easily removed or replaced from front without disturbing the Grate.

Sixth. The Shaker cannot clinker—it allows removal of ashes without loss of half of the fuel in the fire box or filling the room with ash dust.

Seventh. The special Ash Pit Dumper takes care of the ash dust, passing it up the chimney behind the Grate as well as ventilating the Ash Pit (see back view).

Eighth. The Summer Front covers entirely the front Grate which is always discolored after being used and when Summer Front is in position this part cannot be seen.

Ninth. Only the best Stove Plate is used in making it.

Tenth. The best workmanship is employed in its manufacture.

Eleventh. It can be supplied in any Electroplate Finish. If desired, we finish it to match interior hardware.

Twelfth. Comes complete, ready to set in position in chimney.

OUTFIT No. 7

No. 10 RADIUM

10 A Size..... $24\frac{1}{2} \times 30\frac{1}{4}$
10 B Size..... $30\frac{1}{2} \times 30\frac{1}{4}$

Outfit No. 7 Includes:

Fireplace—No. 10 Radium Grate, together with Summer Front, in any Electroplate Finish.

Facing—Any Metal Plate Facing shown on page 14. (If tile facing is preferred, see explanation on page 13.)

Hearth—Best quality enamelled Tile—any color—or red unglazed Tile— 60×21 inches.

Price of Outfit No. 7, complete.....\$21.50

Prices of different parts of these outfits will be found on page 13.

OUTFIT No. 8

No. 11 RADIUM

11 A Size..... $24\frac{1}{2} \times 30\frac{1}{4}$
11 B Size..... $30\frac{1}{2} \times 30\frac{1}{4}$

Outfit No. 8 Includes:

Fire—No. 11 Radium Grate, together with Summer Front in any Electroplate Finish.

Facing—Metal Mantel Facing shown on page 14, or best quality enamelled Tile, any color. See page 13.

Hearth—Tile, best quality enamel—any color—or red unglazed Tile— 60×21 inches.

Price of Outfit No. 8.....\$21.50

Radium Grates

OUTFIT No. 9

No. 12 RADIUM

12 A Size.....24½x30¼
12 B Size.....30½x30¼

Outfit No. 12 Includes:

Fireplace—No. 12 Radium Grate, together with Summer Front, in any Electroplate Finish.

Facing—Metal Mantel Facing shown on page 14, or any color of Tile, best quality enamel. See page 13.

Hearth—Best quality enamelled Tile—any color—or red unglazed Tile, 60x21 inches.

Price of Outfit No. 9.....\$21.50

Prices of separate parts of these outfits will be found on page 13.

OUTFIT No. 10

MISSION RADIUM No. 13

13 A Size.....24½x30¼
13 B Size.....30½x30¼

Finished in Dead Black only.

Outfit No. 10 Includes:

Fireplace—Mission Style Radium Grate, together with Summer Front, in Wrought Iron Finish.

Facing—Metal Plate Facing, No. 46, shown on page 14, which harmonizes in finish and design with this Grate.

Hearth—Best quality enamelled Tile—any color—or red unglazed Tile—60x21 inches.

Price of Outfit No. 10, complete.....\$21.50

The Wolverine Grate

Back View

The accompanying illustrations show our Wolverine Grate, which is built on the Direct Draft principle. The body is put together and shipped in one piece, so that it arrives ready to be set into chimney opening.

We use the best Brick Liners; these are removable from the inside. The Steel Summer Front is light and easy to handle. It has an extra large Fire-pot and Double Draft Damper in back. Where a low priced Grate is wanted, this design will give excellent satisfaction.

Size24½x30¼

Outfit No. 11 Includes:

Fireplace—No. 701 Wolverine Grate, complete with Summer Front, in any Electroplate Finish.

Price of Outfit No. 11.....\$19.50

OUTFIT No. 11

Facing—Metal Mantel Facing, shown on page 14, or Tile, best quality enamel. If Tile is preferred, see page 13.

Hearth—Best quality enamelled Tile—any color—or red unglazed Tile—60x21 inches.

The X-Ray Grate

The X-Ray Grate is direct draft in principle same as all other Grates on the market except the Aldine. It, however, embodies in its construction a number of improvements not found in any other Grate of this type:

Double Draft Dampers A and B.

- Front Slide Damper C.

Ventilating Damper D, which also carries off all dust when shaking down ashes.

Full One-piece Cast Iron Summer Front to Crown Piece, covering Grate Front and entirely closing opening.

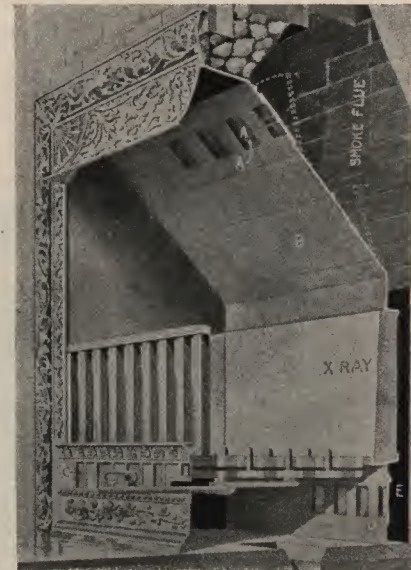

Fire-pot extra wide and deep.

Equipped with double sliding Grate Front where so ordered.

Brick or Iron Liners as preferred—no difference in price.

Liners removable from inside.

Projecting Ash Screen preventing ashes from falling out in front.

Outfit No. 12 Includes:

Fireplace—No. 1 X-Ray, complete with Summer Front, in any Electroplate Finish.

Facing—Metal Mantel Facing, shown on page 14, or best quality enamelled Tile, any color. If Tile is preferred, see note on page 13.

Hearth—Any color of enamelled Tile, best quality, or red unglazed Tile, 60x21 inches.

Price of Outfit No. 12.....\$25.00

ELECTRIC FIREPLACE

The Luminous Electric Open Fireplace consists of an Ornamental Front Frame fitted with a Polished Copper Reflector at the back, all made of the best Stove Plate cast iron, the best heat radiating substance known, and equipped with three or more large cylindrical incandescent heating lamps. A small filament emits a powerful heat the moment the current is turned on. The heat is both radiated and reflected instantly, and unlike other heaters does not depend for its operation on setting up a current of warm air, which takes a length of time. The advantages of cleanliness, safety and ease and quickness of operation are manifold.

Outfit No. 13 includes:

Fireplace—Electric in Oxidized or Brushed Brass Finish.

Facing—Metal Mantel Facing shown on page 14, or best quality enamelled Tile, any color. If Tile is preferred see note on page 13.

Hearth—Any color of enamelled Tile, best quality, or red unglazed Tile, 60x21 inches.

Send for special price lists, showing different voltages and wattages, and net prices.

X-RAY No. 1

Size30½x30¼
Special Size32x32

Size 24½x30¼. Prices, Fireplace only.....\$15.50-\$18.25
Size 30½x30¼. Prices, Fireplace only..... 19.00- 21.75

Prices depend on voltage and wattage. In the smaller size these range from 95-105 to 200-225 voltage, and 750-1500 wattage. In the larger size voltage range is from 106-115 to 200-225, and the wattage is from 1000-2000.

Prices of separate parts of outfits will be found on page 13.

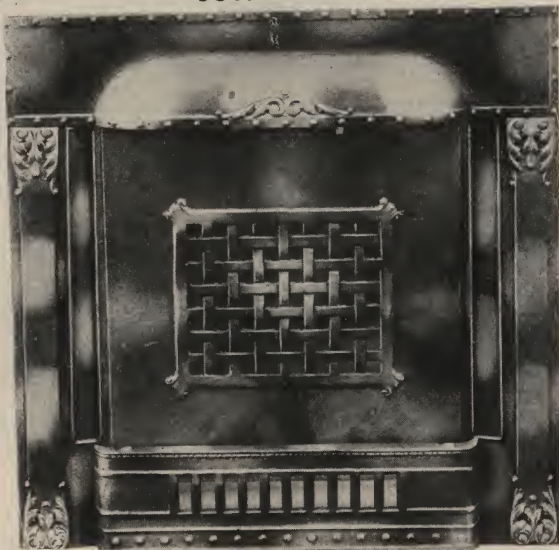

Unmounted Grates

Our Perfection is an unmounted Grate; that is, the different parts are shipped separately. They can, however, be easily put together by any one. The Basket is so made that it is very easy to poke out the ashes. It is constructed of heavy iron and hangs on the Frame, which is also

made of heavy cast iron. This Grate is suitable for burning hard coal, soft coal, coke or wood.

We furnish these grates in any Electroplate Finish. If desired, we will match any interior hardware or trimmings. For a low priced Grate, the Perfection is a remarkable value and will give excellent satisfaction.

Facing—Metal Plate Facing shown on page 14, or any color of best enamelled Tile. If Tile is preferred see note on page 13.

Hearth—Best quality of enamelled Tile—any color—or red unglazed Tile—60x21 inches.

Price of Outfit No. 17.....\$13.75

See page 13 for separate parts of these outfits.

Aldine Odorless Gas Grate

Our patented "Odorless" Gas Grate is the only one ever produced that is absolutely without odor. This result is accomplished by securing perfect combustion and avoids the necessity of chimney flue or ventilating pipe.

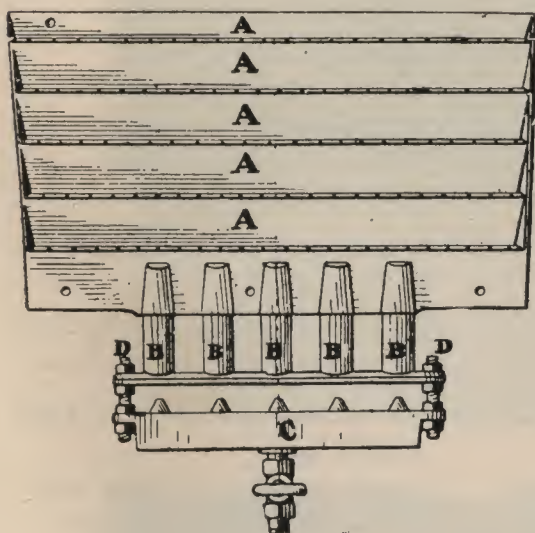

This Grate is built entirely of best Stove Plate castings, the best heat radiating material known. After being burned for a few minutes at full pressure, until the radiating plate is well heated, it will give off full heat at half or two-thirds pressure.

By using a special adjustable supply valve we

enable any user to regulate the Grate to any kind or any pressure of gas. The process is perfectly simple—any one can operate it easily.

This Grate can be placed in any part of a room with perfect safety, no chimney or other ventilating flue being required.

On the following page we show two styles in which our Odorless Gas Grate is made, outfits Nos. 20 and 21. Outfits Nos. 18 and 19 are Single Mixer Gas Grates.

WHY ODORLESS GAS GRATES WILL NEVER SMELL.

This diagram of our Burner Plate and Mixer (fully covered by patents) illustrates it.

A—Burner Plate.

B—Mixing Tubes.

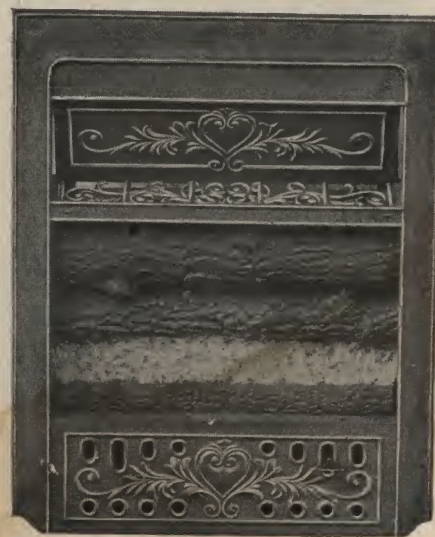

C—Supply Box, regulated to suit pressure or quality of Gas.

D—Adjustment, perfectly simple and absolutely reliable. Any one can handle it and get best results.

It is well known that the proper method of securing perfect combustion in gas burners, whereby all of the gas is burned up and none left to smell, is the taking in of a proper proportion of air or oxygen, to mix with the gas. This proportion is 80 per cent of air to 20 per cent of gas, and where such a mixture is obtained the flame will be a pure blue and perfectly odorless, because all of the gas is burned and none is left to escape into the surrounding atmosphere. It is not the burned gas which smells, but the escaping unburned gas.

In order to accomplish the above results in our Odorless Gas Grate, the only one of the kind ever put on the market that was successful, we adopted a mixing plan, viz., the taking in of the air to mix with the gas, entirely different from that used on any other grate and fully covered by patents. Where all other grates have simply one inlet for air, it will be noted from the accompanying illustration that we equip ours with five of these inlets, thus increasing the intake of air to the correct proportion, and as all of these grates are carefully tested and adjusted before being sent out of our factory, they will always be found to be absolutely accurate.

ODORLESS GAS LOG GRATES

Size, 24½x30¼ only

Important Note.—All of our Gas Grates are Equipped as Wanted for Either Artificial or Natural Gas. State, when ordering, whether Natural or Artificial Gas is to be used. Summer Fronts included with all Gas Grates without Extra Charge.

Aldine Gas Grates

On the preceding page is a full explanation of our patented device whereby we secure perfect

combustion, and eliminate any possibility of escaping odor from our Odorless Gas Grates.

OUTFIT No. 18

SINGLE MIXER GAS RANGE No. 111

Outfit No. 18 includes:

Fireplace—No. 111, Single Mixer Gas Grate, including Summer Front.

In Two Sizes

24½x30¼ 30½x30¼

Facing—Metal Mantel Facing, shown on page 14, or Tile of best quality enamel, any color. See page 13.

Hearth—Best quality enamelled Tile—any color—or red unglazed Tile—60x21 inches.

Price of Outfit No. 18.....\$16.50

OUTFIT No. 20

ODORLESS GAS GRATE No. 102

Outfit No. 20 Includes:

Fireplace—No. 102 Odorless Gas Grate, including Summer Front.

In Two Sizes

TILE FACING—We can furnish Tile Facing, unslabbed, at the same price as Metal Plate Facing, or we can furnish tile slabbed, ready to be set in place, for \$2.75 in addition

to the price of Metal Plate Facing. See page 2 for description of the process of slabbing.

Metal Mantel Plate Facings

Metal Mantel Plates for facing take the place of tile, are better and less expensive, because:

First. They are made of the finest Stove Plate iron, in only three pieces (one top and two sides). These are securely bolted together and screwed to the back of the Mantel. Tile Facings, on the other hand, are made up of many small pieces, which may loosen and fall out and can be only insecurely fastened in place by wires.

Second. They are finished in the same Electroplate Finish as the Fireplace Front, a harmonious and handsome effect. This finish will stand up always and can be easily cleaned. Tile are not uniform in design or color, and show great numbers of fine

cracks after a short time. These absorb dirt, which can not be cleaned out, and thus the appearance of the facing is permanently ruined.

Third. There is no danger of breakage in shipment of Metal Mantel Plates, whereas Tile Facings, being very fragile, often arrive damaged from rough handling.

Fourth. Metal Mantel Plates are absolutely uniform in size, while Tile Facings must necessarily vary somewhat.

*Any design metal plate facing can be used with any of the grate outfits shown in this catalog, providing metal plate facing fits mantel to be used. See note under each illustration.

Specify whether gas logs are to be used with natural or artificial gas, as in some instances there is a little difference in the burner, also in the valve.

MISSION DESIGN

S. H. 3000

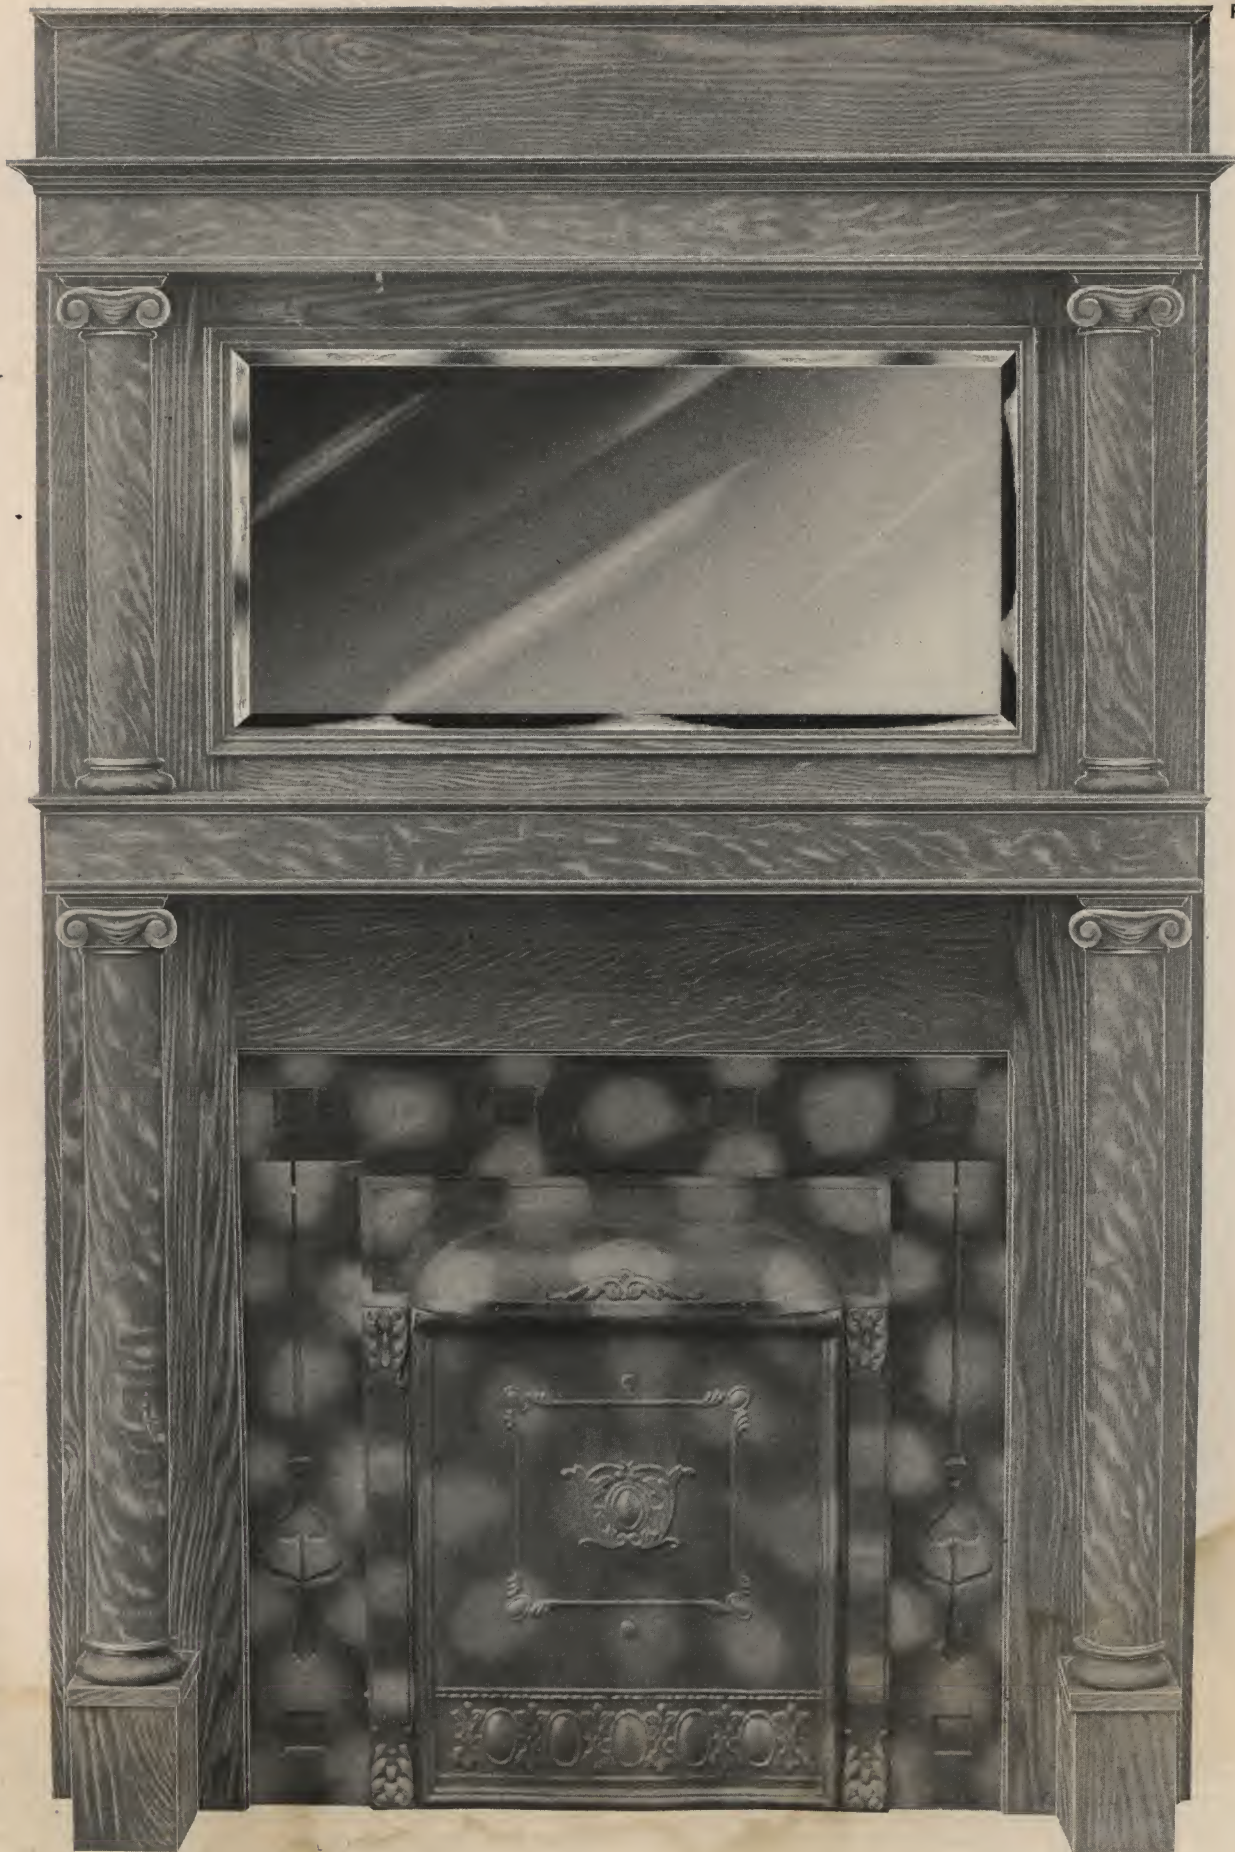

This is an excellent design for dining-room, den, hall or any room where a mirror is not desired, and is especially appropriate in a house finished in mission construction. It is made throughout of the best grade of **Quarter Sawn clear White Oak**, which is thoroughly seasoned and kiln dried before being used. All the woodwork is hand smoothed and hand finished in a beautiful Weathered Oak finish.

Mission Style Grate and Mission Metal Plate Facing should always be used with this Mantel, as shown in the

illustration. The correct effect cannot be secured by using Tile or the regular style of Grate.

This Mantel is 5 feet 1 inch in height and the adjustable Wall Plates can be moved to make any width from 5 feet to 5 feet, 2 inches. The Mantel, or Tile opening is 42 inches wide by 42 inches high, and the Profile, or Tile projection, is 1 7/8 inches. The pilasters are 7 inches at the base and taper to 5 inches at the top.

Price of Mantel.....\$19.00

AN EXCEPTIONAL VALUE IN A LOW PRICED DESIGN

SH 3002

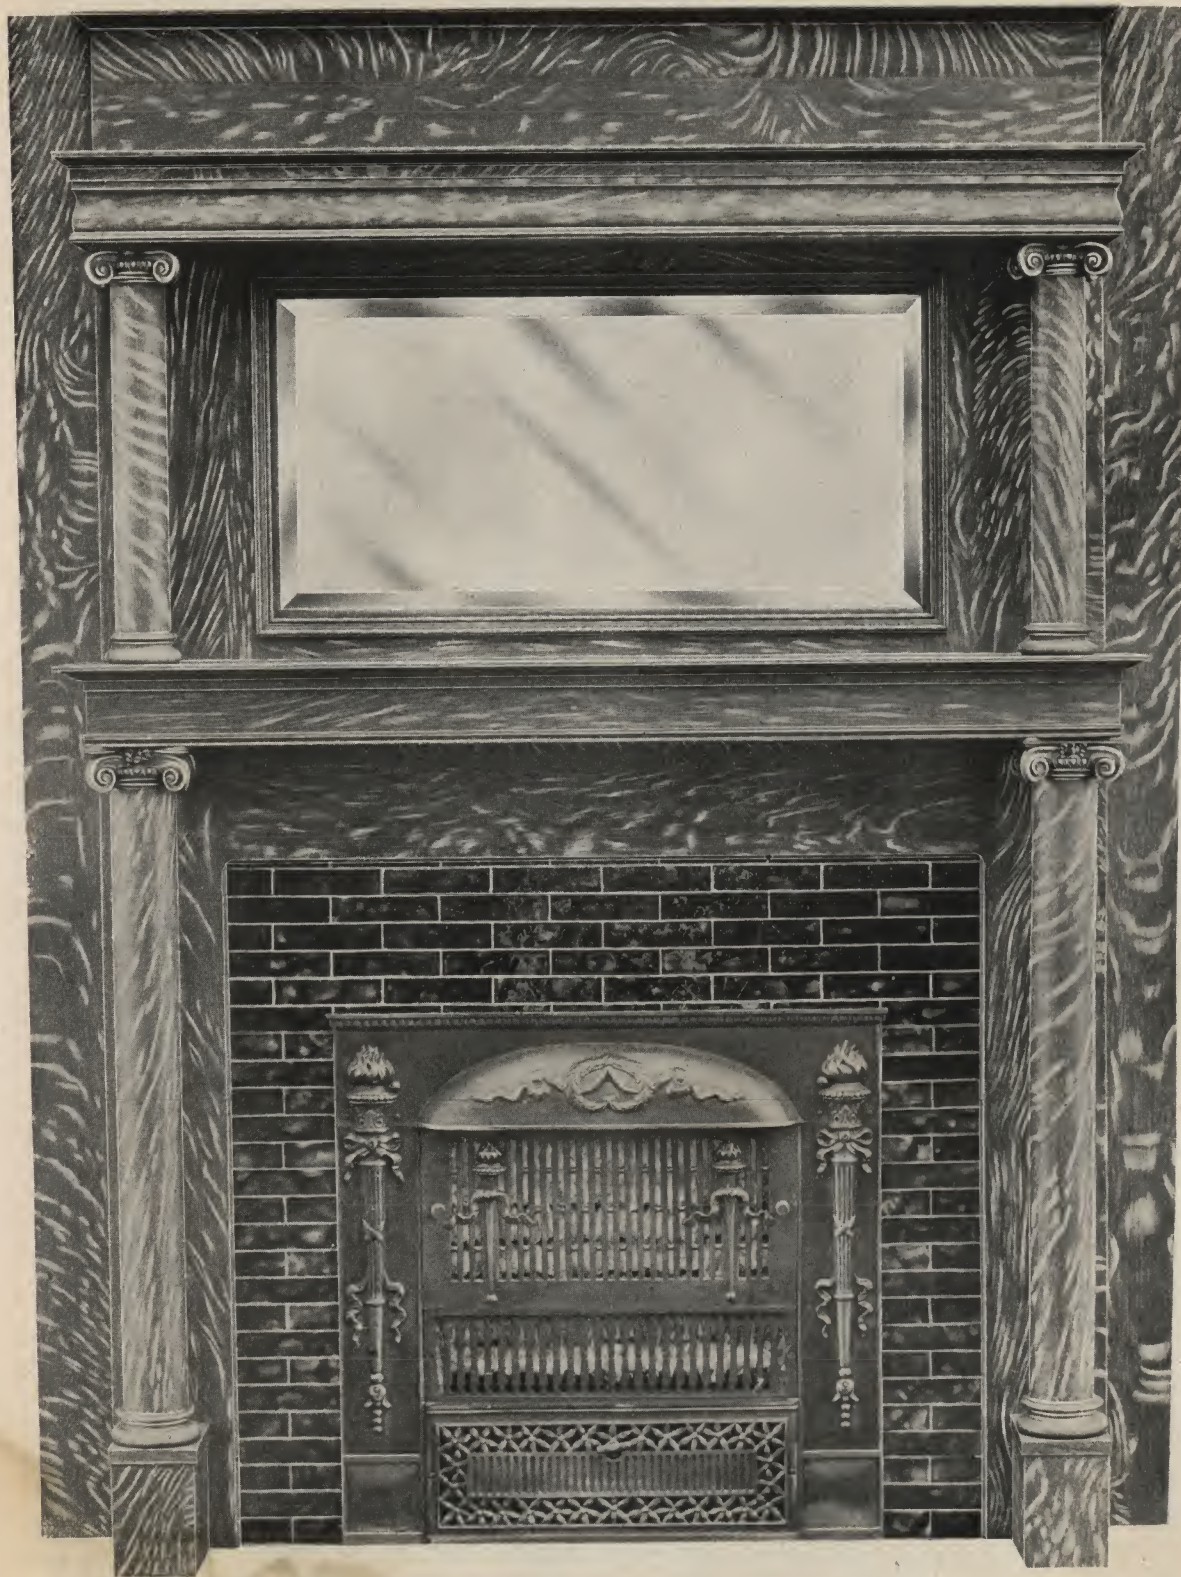

This Mantel is made from the best selected white oak, thoroughly kiln dried. The columns and box front are quarter-sawn, veneered and are finished in a very rich Golden Oak. It is hand made, gloss finished, and fitted with a heavy Bevel Plate Mirror 36 inches wide and 18 inches high.

This Mantel is 7 feet, 2 inches, and the Wall Plates can be adjusted to any width from 4 feet 4 inches to 5 feet. Mantel open-

ing is 36 inches wide by 36 inches high, and Tile projection or Profile is 1 7/8 inches. The lower columns are 3 1/2 inches in diameter, the upper, 3 inches, and are capped with Composition Capitals. Base shelf stands 48 inches from the floor.

Price of Mantel only, with Mirror.....\$21.50

No charge for crating.

OUR MOST POPULAR DESIGN

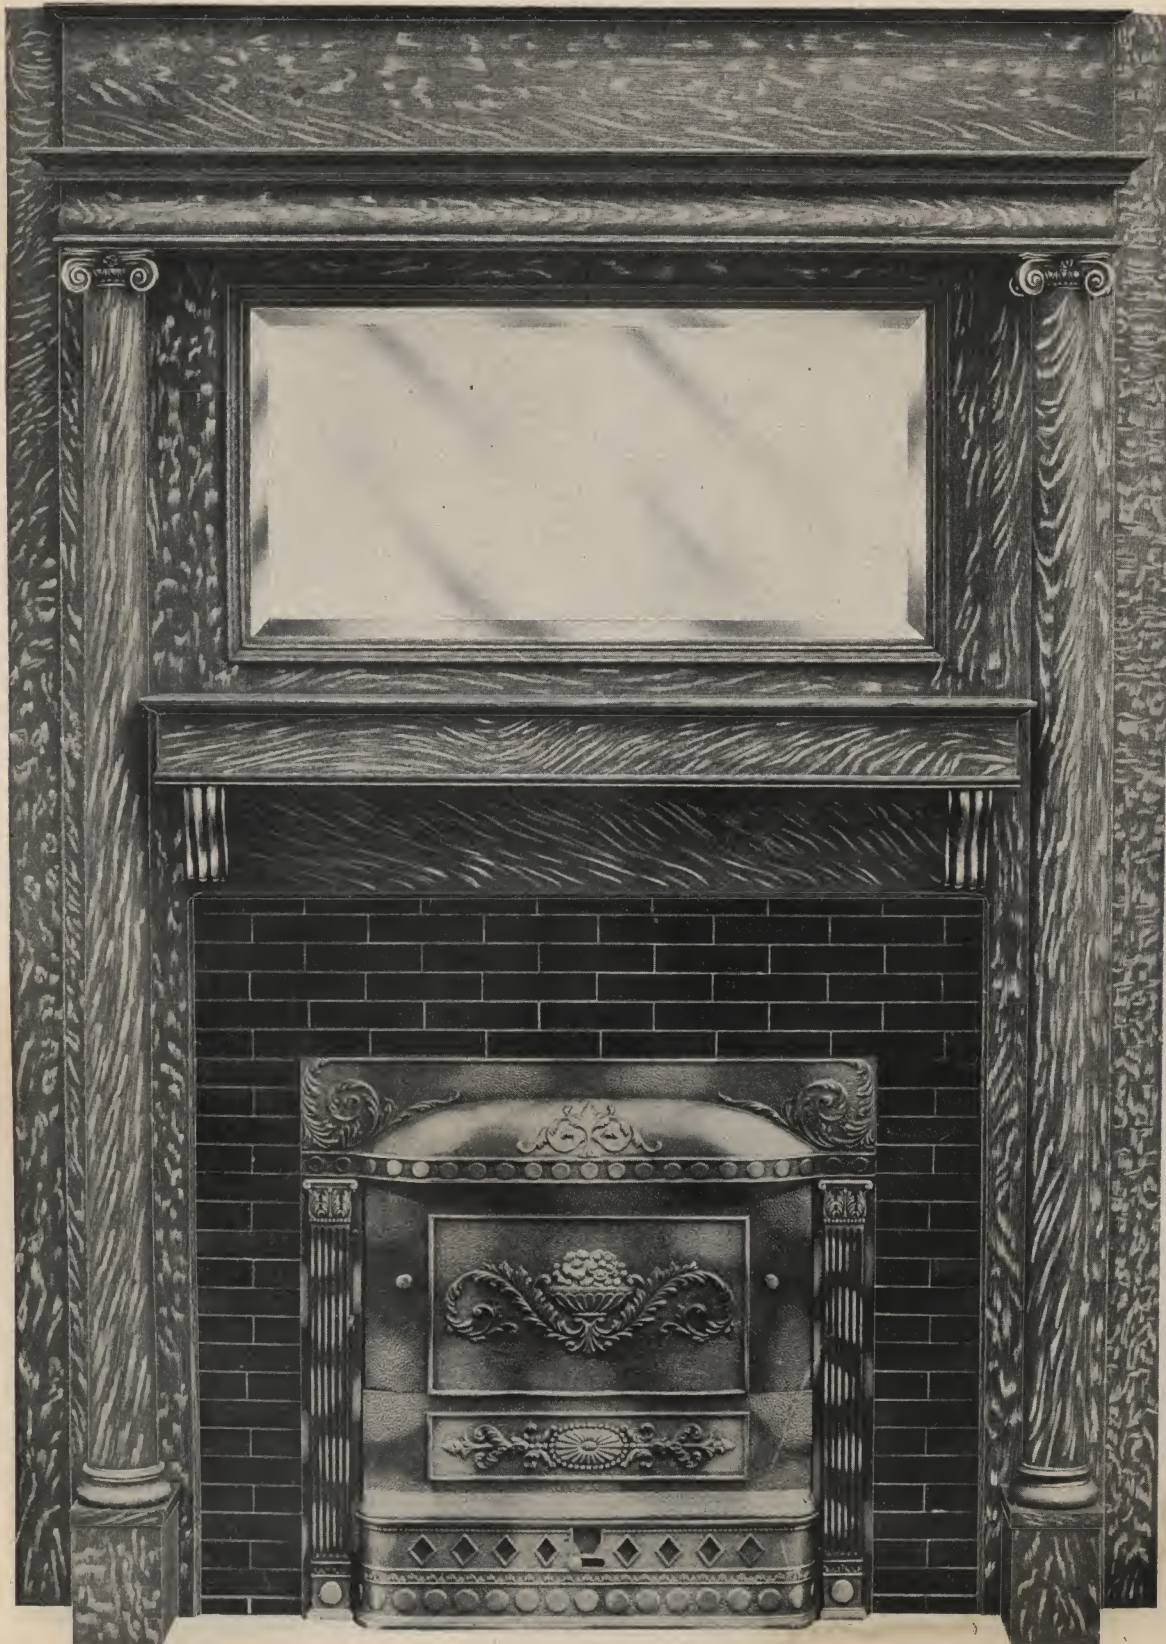

SH 3004

This illustration shows the design that has been the most popular among our customers. The stock used is White Oak, carefully selected, kiln dried, and Quarter-sawed throughout. The Mantel is hand rubbed, hand polished and piano finished to match any standard finish woodwork, and has a heavy Bevel Plate Mirror, 36 inches wide by 18 inches high.

We can also furnish it in Birch in a Natural or Mahogany finish.

This Mantel is 7 feet 2 inches high and the width can be adjusted from 4 feet 9 inches to 5 feet 2 inches by changing the Wall Plates. The Mantel opening (tile opening) is 42 inches wide by 39 inches high, and the Profile (tile projection) is 1 1/4 inches. The Upper Columns are 3 inches in diameter and the lower 3 1/2 inches. They are fitted with Hand Carved Capitals.

Price of Mantel SH 3004, with mirror.....\$23.50
No charge for crating.

AN EXCELLENT TYPE

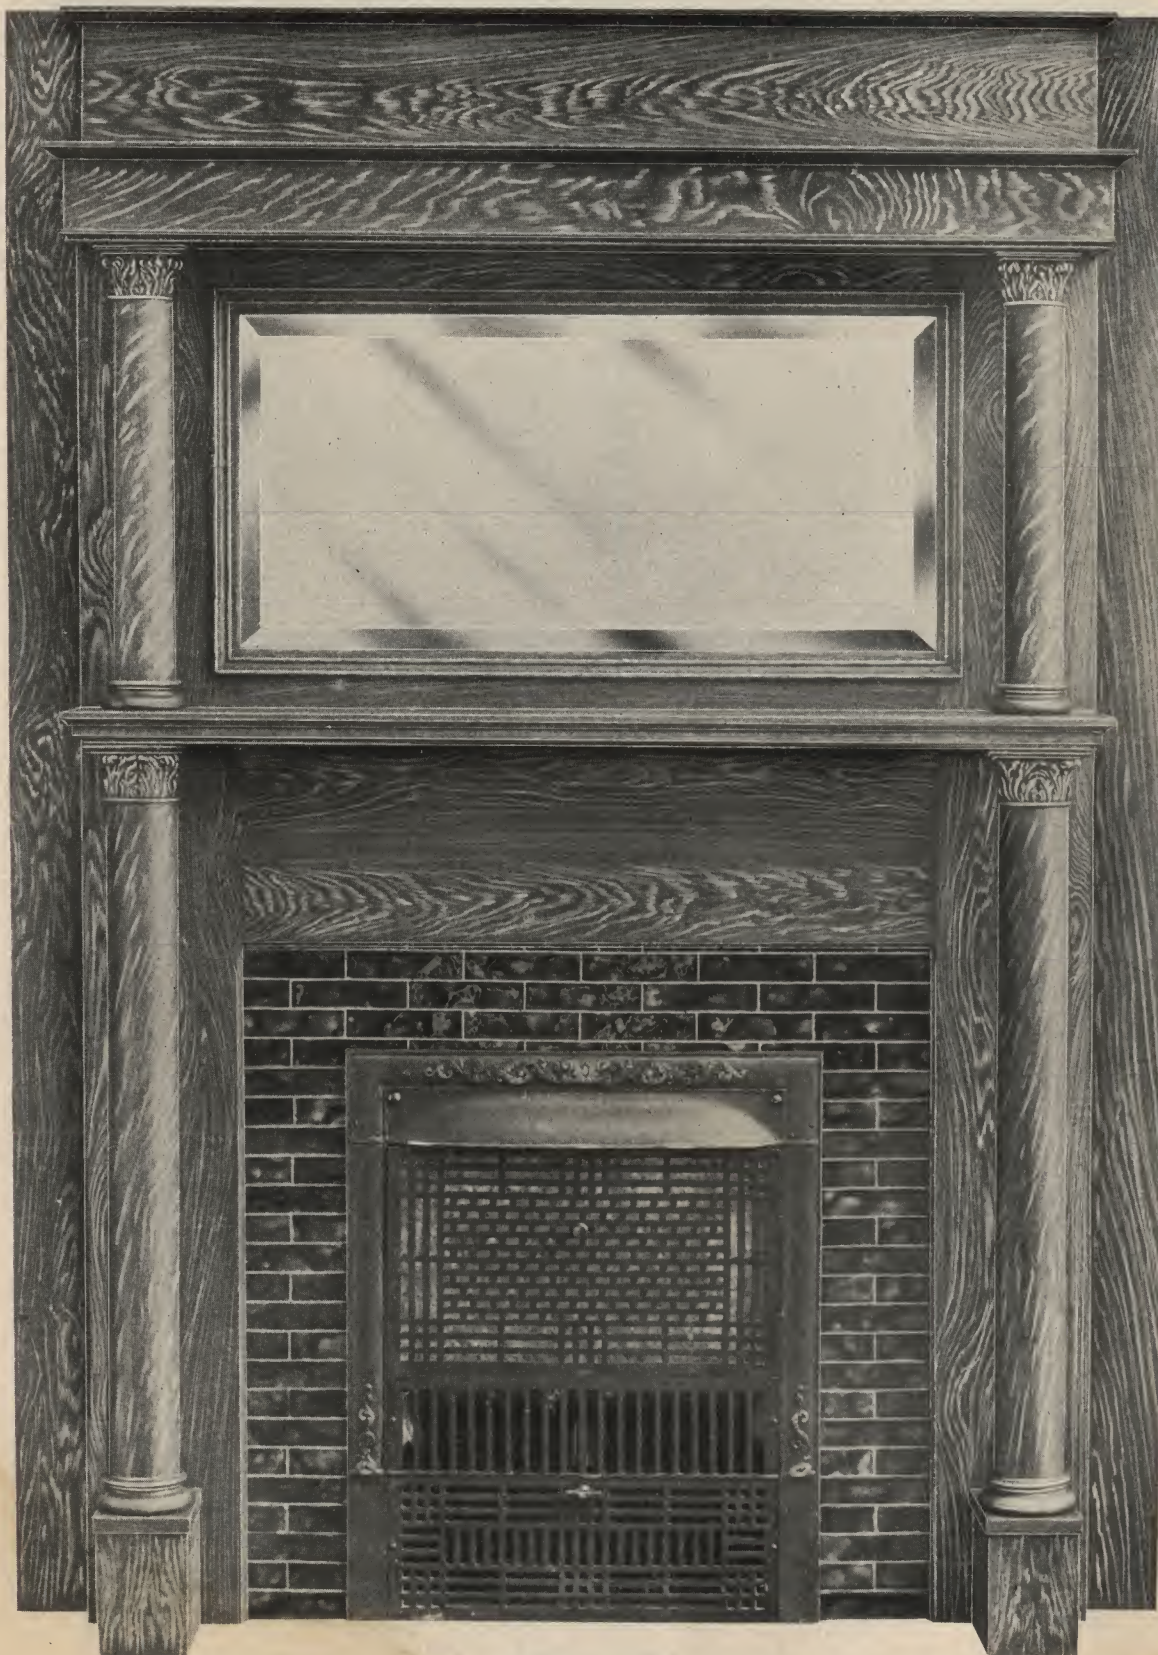

SH 3006

This is also a very popular design with our customers. For those who like Full Length Columns it is an excellent selection. Best Quarter-sawed White Oak is used throughout in its construction, and it is hand rubbed, hand polished and piano finished to match other woodwork. If desired, we will furnish it in Birch, in Natural or Mahogany finish.

This Mantel is 7 feet 2 inches high, and the movable

Wall Plates can be adjusted to any width from 4 feet 9 inches to 5 feet 2 inches. The Mantel opening is 42 inches wide by 39 inches high and the Profile, or Tile projection, is 1 7/8 inches. The Columns are 3 1/2 inches in diameter and are mounted with Hand Carved Wood Capitals. The Mirror is a heavy Bevelled Plate, 36 inches wide by 18 inches high.

Price of Mantel only, with mirror.....\$22.50

AN EXCELLENT MANTEL FOR BUT LITTLE MONEY

SH 3008

Nothing but the best materials and workmanship enter into the construction of this Mantel. All the wood is thoroughly seasoned and kiln dried. The Columns and Box Front are made of Quartered Oak, the rest of the Mantel of selected White Oak, and the whole is finished in a rich Golden Oak. It is hand made, gloss finished, and is fitted with a heavy Bevel Plate Mirror, 36 inches wide by 18 inches high.

This Mantel is 7 feet high and the width can be changed

from 4 feet 6 inches to 5 feet 2 inches by moving the adjustable Wall Plates. The Mantel or Tile opening is 36 inches by 36 inches, and the Tile projection or Profile is 1 7/8 inches. Upper Columns are 3 inches in diameter and the lower 3 1/2 inches, both upper and lower being fitted with Composition Capitals.

Price of Mantel only, with mirror.....\$17.25

No charge for crating.

A GOOD MANTEL FOR LOW PRICED HOMES

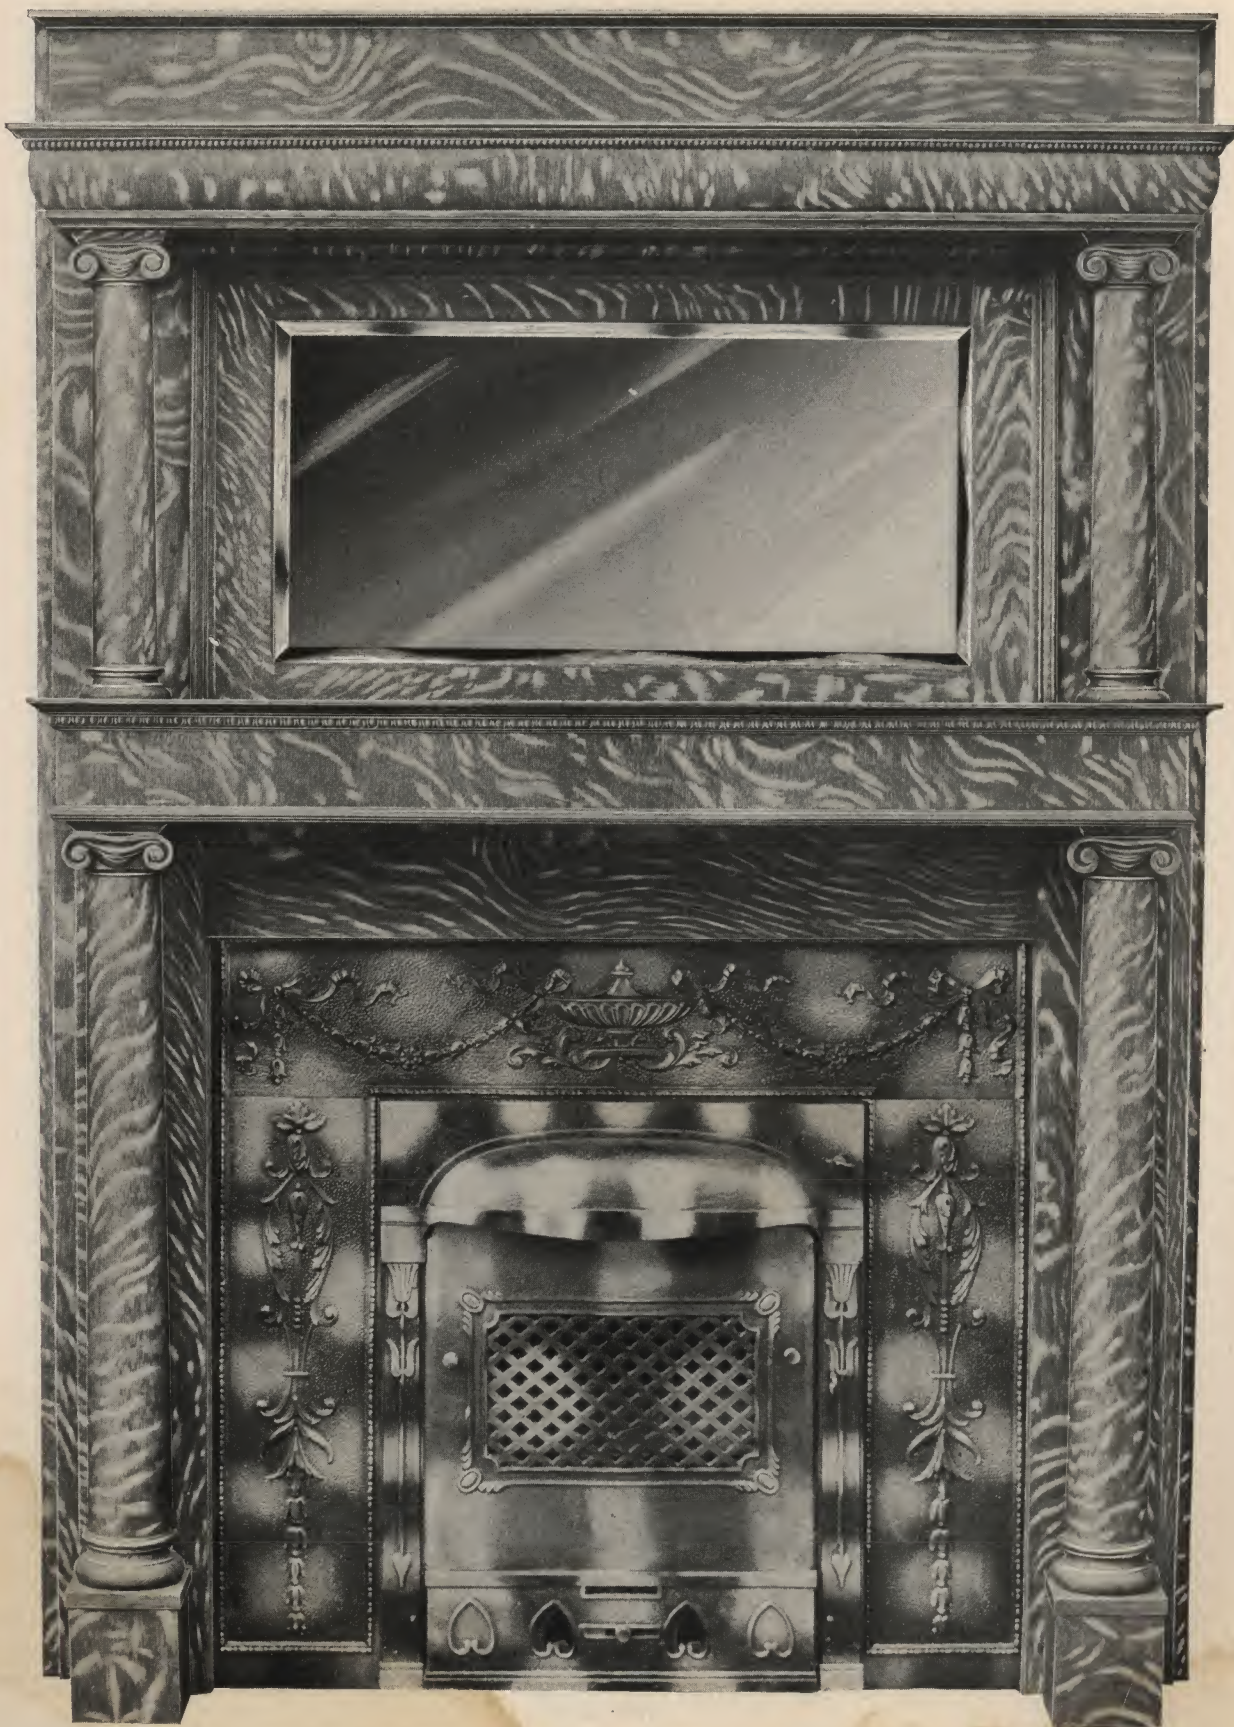

SH 3010

This Mantel is like the one shown on the preceding page, except that it has Full Length instead of Upper and Lower Columns. The Box Shelf and Columns are made of Quarter Sawn Oak; the rest of the woodwork is clear, White Plain Oak. It is hand made and gloss finished in Golden Oak or to match other woodwork, as desired. We also furnish it in Birch—natural or mahogany finish.

This Mantel is 7 feet high; the width can be adjusted

from 4 feet 6 inches to 5 feet by changing the Wall Plates. The columns are 3½ inches in diameter and are mounted with Composition Capitals. The Mantel or Tile opening is 36 inches each way and the Profile, or Tile projection, is 1½ inches. The Mirror is a heavy Bevelled Plate, 36 inches wide by 18 inches high.

Price of Mantel only, with mirror.....\$19.00

A WELL PROPORTIONED DESIGN — BEAUTIFULLY GRAINED

SH 3012

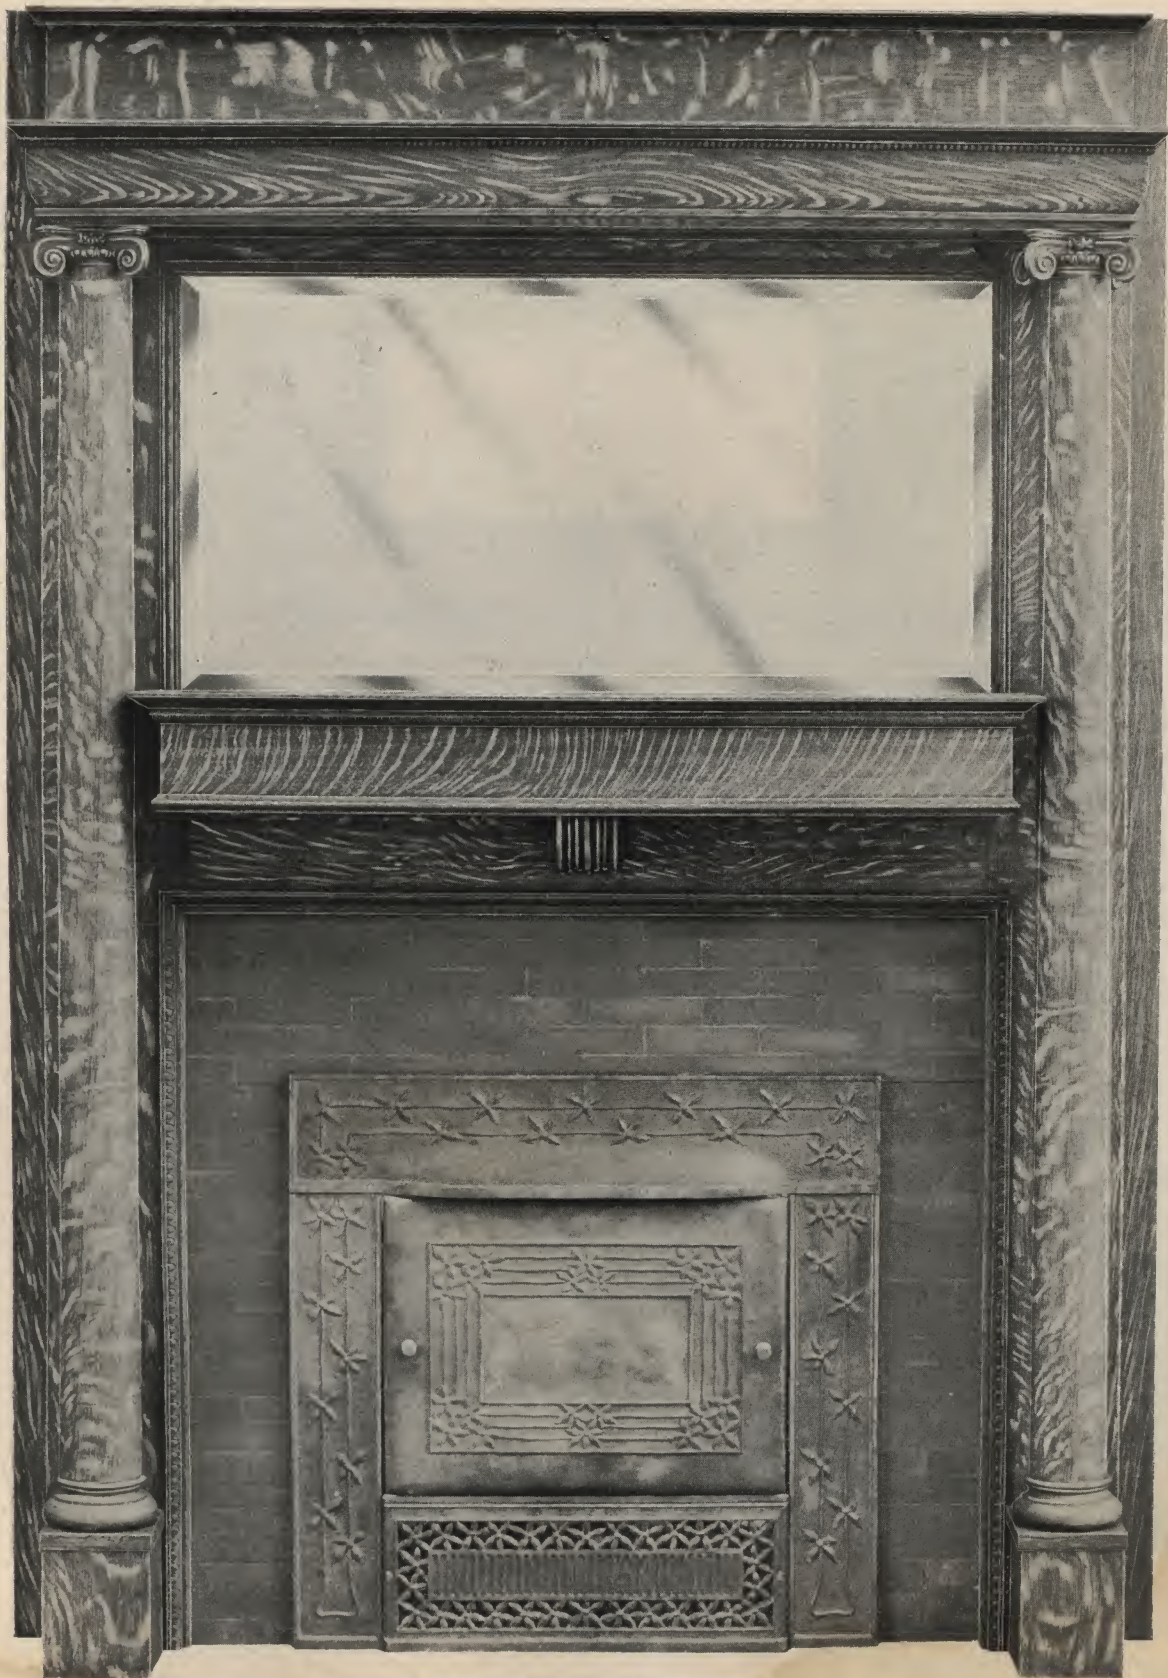

A handsome Mantel of clear, Quarter Sawn White Oak, finished to match other woodwork, or of Birch in Natural or Mahogany finish. Unless ordered otherwise, we always ship in a Golden Oak finish.

We take special care in selecting the stock for our Mantels, so as to show to best advantage the beauty of the grain. Thorough seasoning and kiln drying makes them proof against warping.

This Mantel is 7 feet 2 inches high and can be adjusted in

width from 5 feet to 5 feet 2 inches. Base Shelf is 51 inches from the floor. The Mantel opening is 42 inches wide by 39 inches high; Tile projection, 1 1/4 inches. The Upper Columns are 3 1/2 inches in diameter and the Lower Columns 4 inches, and are mounted with Hand Carved Wood Capitals. Mirror is a heavy Bevelled Plate, 36 inches wide by 18 inches high.

Price of Mantel only, with mirror.....\$33.50

A MATCHLESS VALUE

SH 3014

This is an inexpensive design which can be appropriately used with nearly all styles of interior construction. As shown here it is made of clear **White Oak, Quarter Sawed**, in a **Golden Oak** finish; but we will finish it, if desired, to match your woodwork. It can also be had in **Birch**, in **Mahogany** or **Natural** finish.

The stock is well seasoned and thoroughly kiln dried and is rubbed, polished and finished by hand.

This Mantel is 7 feet 2 inches high and the width can be adjusted from 4 feet 10 inches to 5 feet 2 inches. Mantel opening is 42 inches wide by 39 inches high; Tile projection, 1 $\frac{1}{4}$ inches. Columns are 3 $\frac{1}{2}$ inches and the Mirror a heavy Bevelled Plate, 36 inches wide by 18 inches high.

Price of Mantel only, with mirror.....\$29.50

OUR MISSION BEAUTY

SH 3016

For a house built in Mission Style this Mantel is very appropriate, and in the correct setting is an attractive and artistic addition to a room. It is made from the **best White Oak**, carefully selected, thoroughly seasoned and kiln dried. All the woodwork is hand smoothed and hand finished in a beautiful Weathered Oak finish.

The illustration shows this Mantel fitted with Mission Style Aldine Grate, and Mission Style Metal Plate Facings. To secure the best effects, Metal Plate Facings, rather than Tile, should be used with this design.

This Mantel is 6 feet 8 inches high and can be varied in width from 5 feet to 5 feet 2 inches by adjusting the Wall Plates. The Mantel, or Tile opening, is 42 inches wide by 42 inches high, and the Profile, or Tile Projection, is 1 1/2 inches. The Pilasters are 7 inches at the base and taper to 5 inches at the top. The Mirror is flat and is 24 inches wide by 12 inches high.

Price of Mantel only, with mirror.....\$27.00

No extra charge for crating.

A PEERLESS DESIGN

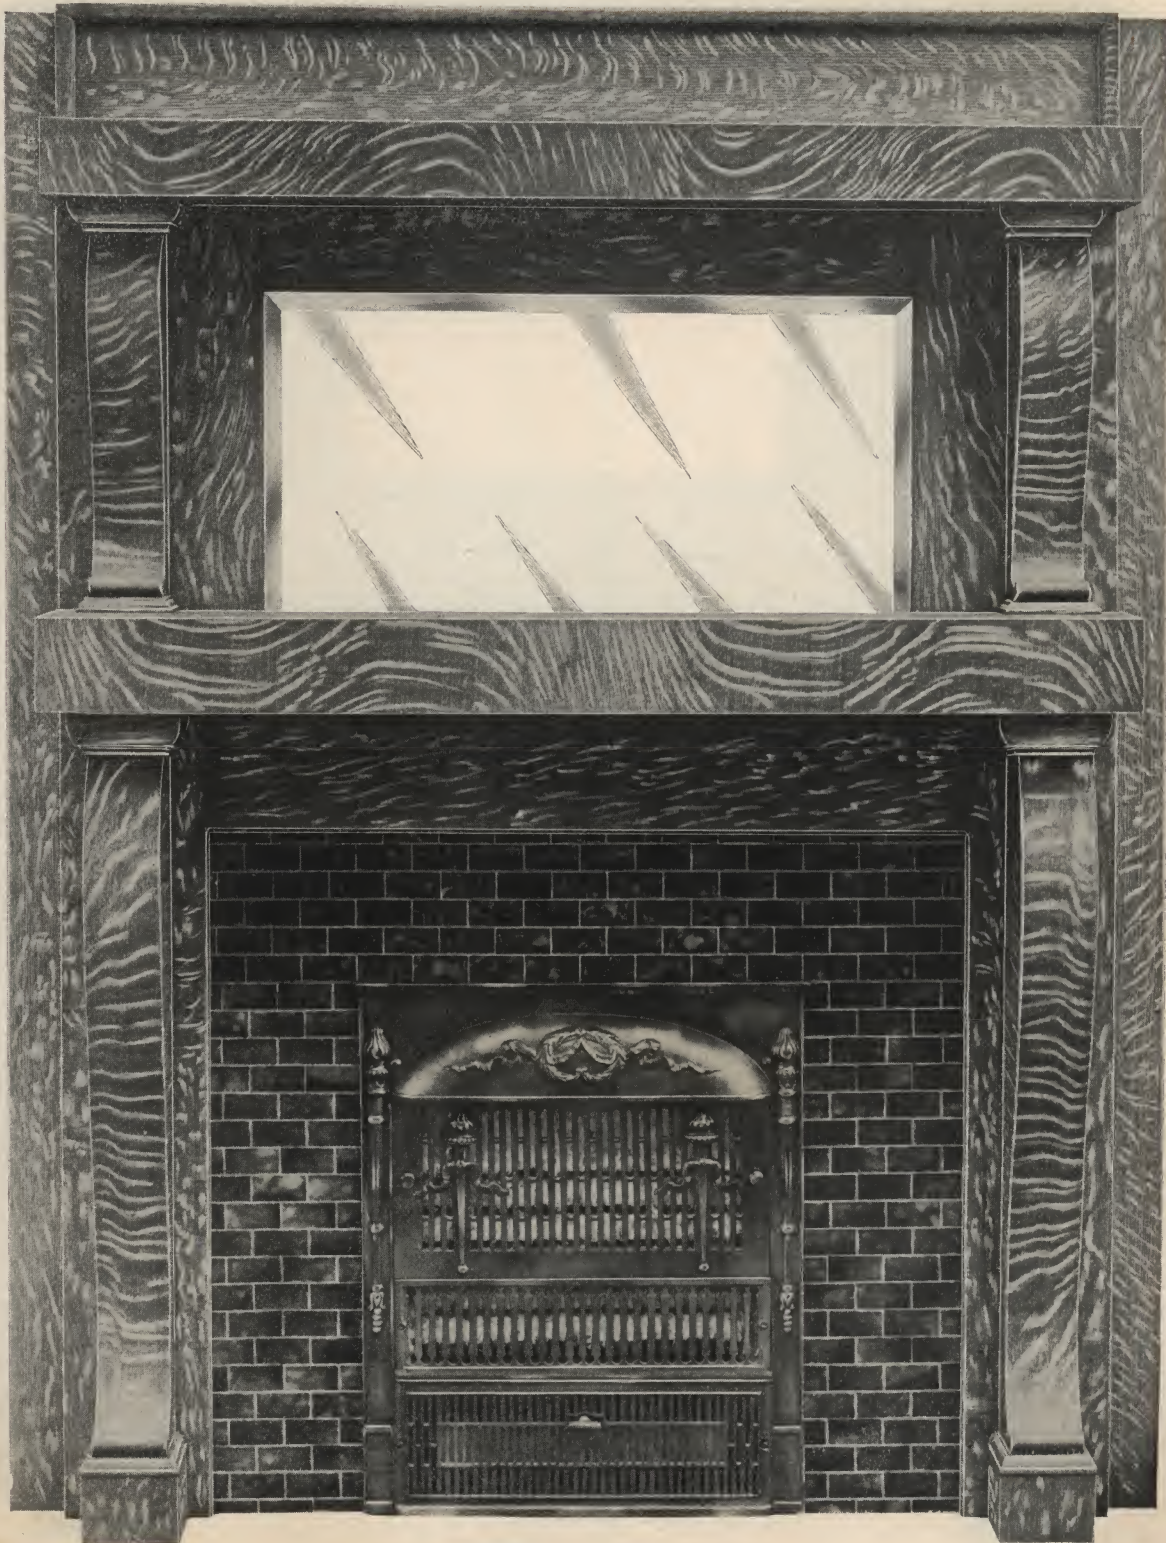

SH 3018

This is a Mantel which will please the taste of those who like massive designs in interior decoration. Note the heavy shelves and the broad, square base columns. The stock is best **Quarter Sawed White Oak**, and is thoroughly seasoned and kiln dried before being used.

This design is finished in **Golden Oak** as shown, but can be furnished, if desired, in **Birch** in Natural or **Mahogany** finish.

This Mantel is 7 feet high and the width is adjustable from 4 feet 10 inches to 5 feet 2 inches. The Mantel opening is 42 inches wide by 39 inches high; Profile, or Tile projection, 1 7/8 inches; Base Columns, 6 inches; Top Pilasters, 4 inches. The Mirror is a heavy Bevelled Plate, 36 inches wide by 18 inches high.

Price of Mantel only, with mirror.....\$41.50

A PARTICULAR MANTEL—FOR PARTICULAR HOMES

SH 3020

This Mantel is a rare combination of massive design and graceful outline. It is hand rubbed, hand polished and hand finished, and is made of carefully selected, **Quarter Sawed White Oak** throughout. The stock used is all thoroughly seasoned and kiln dried.

As illustrated this Mantel is a rich Golden Oak, but it can also be had in Birch, in either Mahogany or Natural finish.

This Mantel is 7 feet and the Wall Plates adjust the width from 4 feet 10 inches to 5 feet 2 inches. Tile opening is 42 inches wide by 39 inches high; Tile projection is 1 7/8 inches; Pilasters 4 inches wide. The Mirror is a heavy French Plate, bevelled 3 sides, 18 inches high by 36 inches wide.

Price of Mantel only, with mirror.....\$41.50

OUR SERPENTINE DESIGN

SH 3022

We consider this one of our most beautiful designs. The unique effect given by the graceful sweep of the shelves and pilasters give this Mantel a very attractive appearance, which must be seen to be appreciated. The illustration does not do it justice. It is made of **Quarter-Sawed Oak** throughout, hand rubbed and hand polished, and finished in a rich Golden Oak.

We also make it in Birch in a Natural or Mahogany finish.

This Mantel is 7 feet 2 inches high, and can be changed in width from 4 feet 10 inches to 5 feet 2 inches by moving the adjustable Wall Plates. The Mantel, or Tile opening, is 42 inches wide by 39 inches high; the Profile, or Tile projection, is 1 $\frac{3}{8}$ inches, and the Base Shelf is 51 inches from the floor. The Mirror is a heavy Bevel Plate of first quality, 42 inches wide by 18 inches high.

Price of Mantel only, with mirror.....\$45.50

No extra charge for crating.

THE "INCOMPARABLE" MANTEL

SH 3024

Simplicity of design and beauty of finish make this one of the most handsome Mantels offered anywhere. It is without equal at the extremely low price we ask for it and even surpasses many Mantels which cost a good deal more. The straight outlines, square massiveness of the Columns, and the deep Profile, produce a rich effect, to which the hand polished, Quarter-Sawed Oak lends a bright tone. This Mantel is made throughout of carefully selected kiln dried **White Oak**, quarter-sawed, hand rubbed and hand polished.

This Mantel is 7 feet 2 inches high, and the width is adjustable

from 4 feet 10 inches to 5 feet 2 inches. The Upper Columns are $3\frac{1}{4} \times 3\frac{1}{4}$ inches and the lower 4×4 inches, both upper and lower being mounted with Hand Carved Capitals. Base shelf is 51 inches from the floor. The Mirror is a heavy Bevelled Plate, 36 inches wide by 18 inches high. The Mantel, or Tile opening, is 42 inches wide by 42 inches high and the Profile, or Tile projection, is 4 inches.

Price of Mantel only, with mirror.....\$30.00

No extra charge for crating.

SCHOERR "PERFECT" CONSOLE

SH 3C50

The Console illustrated on this page is a striking example of the care we use in selecting stock. It is made throughout of the best quality of **Quarter-Sawed White Oak**, thoroughly seasoned and kiln dried. It is correctly proportioned and has beauty of outline without being ornate in design. The finish is a rich Golden Oak. The Mirror is a French Bevelled Extra Heavy Plate, 34 inches wide by 54

inches high. If desired, we can furnish this Console in a Natural or Mahogany finish.

Height of Console is 7 feet 5 inches and the width can be adjusted from 4 feet 4 inches to 5 feet by drawing out the Wall Plates. The Columns are 3½ inches in diameter.

Price, open\$21.00
Price, with Mirror 37.50

Our Liberal Terms

5 PER CENT DISCOUNT

All prices listed in this catalogue are net—subject to 5% off when cash in full accompanies your order.

On orders of \$50 or less, certified check, bank draft, postal or express money order should accompany same.

Deduct 5% from catalogue prices on these orders.

But, on larger orders, consisting of stock or special items, we will enter same on a part payment of at least 25% cash with order, balance to be paid in full before any of the goods are shipped, and allow the 5% cash discount.

OPEN ACCOUNT ORDERS

We will sell and ship direct to responsible persons on their own account or on a bank guarantee of payment of any order. Payment is to be made within thirty days after each shipment, subject to sight draft if not paid. We reserve the right to take the necessary time to look up financial standing before entering or accepting the order.

Goods will be shipped direct to such customers, but on these orders we cannot allow the 5% cash discount.

The 5% cash discount can only be had on orders where full payment is made before goods are shipped.

C. O. D. SHIPMENTS

We will enter orders amounting to more than \$50 for C. O. D. shipments on a part payment of not less than 25% of the bill. The cash discount of 5% will be allowed on such part payment, but cannot be allowed on the amount collected C. O. D.

On C. O. D. shipments we consign the goods

to Schaller-Hoerr Co., or to a bank in your city, drawing draft with shipping receipt attached. Notice is sent you of such shipment, with name of bank through which draft is drawn. Payment of balance is made by you to bank who hand you the shipping receipt. By presenting this receipt to the agent of the railroad company the goods are delivered to you.

NO CHANGE IN TERMS

No one has authority to make other terms.

GUARANTEE

Do not forget our guarantee—you will find it on page 1.

Also you are at liberty to investigate our financial standing at all times, by asking your banker—or any bank in Chicago—or any of the Credit Books.

The Mantels and Grates shown in this catalog are but one department of our business. We are Millwork and Building Material Specialists and carry in stock for immediate shipment a complete line of Sash, Doors, Mouldings, Interior Trim, Stairwork, Flooring, Porchwork, Glass, Paints, Roofing Paper, Galvanized Iron Work, Cement Block Machines, etc.

If you have not seen a copy of our large Building Material Catalog, drop us a postal card and we will send you one by return mail. It shows the most up-to-date designs and quotes the lowest prices being made by any Millwork and Building Material firm in the country.

If you are going to build, or need anything in any line of Building Material, write and tell us what you want and we will make you an estimate.
